

Steuben County Landfill Expansion

Fact Sheet

The Steuben County Landfill is a state-of-the-art solid waste management facility providing environmentally sound disposal services for residents, businesses, and institutions serving the residents and businesses of Steuben County and surrounding communities. The Steuben County Landfill is a non-hazardous landfill, engineered with environmental protection systems including engineered liners and covers, leachate collection and removal, and landfill gas collection and control. A NYSDEC monitor is located onsite to oversee daily landfill operations.

Permit to Operate: New York State DEC

Effective: February 13, 2014 – February 12, 2024

Property Ownership: 564 acres

Permitted Footprint Area: 80 acres

Expected Remaining Permitted Life Span: 5 years

Approved Design Capacity: 850 tons-per-day

Landfill Eastern Expansion

The Proposed Landfill Expansion would allow the Facility to continue to operate beyond the current permitted site life, providing sufficient capacity to satisfy the community's long-term disposal needs. A site plan located on the back of this fact sheet provides the layout of the existing permitted footprint, the total property owned by the County and the preferred landfill footprint. Key features of the proposed expansion include:

- **73 acres of Additional Landfill Footprint**
- **Support facilities (stormwater drainage, leachate conveyance, landfill gas collection)**
- **Approximately 40 years of Additional Site Life**

What will not change?

The proposed Landfill Expansion simply allows the Facility to continue to operate beyond the current permitted site life (set to expire in 2024) therefore the following components will not change with the proposed Expansion consistent with the currently permitted operations:

- Permitted Design Capacity (850 tons/day)
- Site Operating Conditions
- Permitted Height
- Origin of Materials Managed
- Hours of Operation
- Types of Materials Accepted
- Commitment to the Environment & Community

Community Input

The environmental review and permitting process has begun and will continue into 2020. There will be opportunities for public comment and input including:

- Public Scoping (through November 6, 2019)
- Public Review of the Draft Supplemental Environmental Impact Statement & NYSDEC Part 360 Permit (tentatively Summer/Fall 2020)
